Office Action Summary

Application No.

09/787,594

Applicant(s)

MOLSEN ET AL.

Examiner

HOAN C. NGUYEN

Art Unit

2871

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 51-84 is/are pending in the application.
- 4a) Of the above claim(s) 1-50, 53, 55-80, 83 and 84 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 51, 54, 81 and 82 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

Applicant's arguments with respect to claims 51, 54, 81 and 82 based on the Response filed on 10/24/2006 have been considered but are in the old ground(s) of rejection.

Therefore, this is Final action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 51 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Maeda et al. (US6285422B1)** and in view of **Hasegawa et al. (US5654780)** and Eichenlaub (US5428366A).

Maeda et al. teach (Fig. 23) a transfective display comprising

- a liquid crystal 10; the liquid crystal disposed between a front substrate 11 and a rear substrate 12;
- a backlight 17 located behind the liquid crystal,
- a partially reflective mirror 220 located between the liquid crystal and the backlight inherently for both reflecting ambient light back through the liquid

Art Unit: 2871

crystal and allowing transmission of light from the backlight through the liquid crystal characterized in that each pixel is provided with a color light filter 160;

- a front polarizer located 14 in front of the front substrate and a rear polarizer 16 is located behind the rear substrate.

wherein

- the rear substrate 12 is provided with the partially reflective mirror 220.

However, Maeda et al. fail to disclose

- a liquid crystal divided into a plurality of pixels with addressing means for addressing each pixel and switching each pixel between different states resulting in different levels of transmission of light through the display,
- a transflective display with the backlight comprising a plurality of sequentially flashing light sources.

Hasegawa et al. teach forming addressing means (TFT) for addressing each pixel and switching each pixel between different states resulting in different levels of transmission of light through the display (col. 8 lines 14-21)

Eichenlaub teaches (Fig. 4) a LCD display with the backlight comprising a plurality of sequentially flashing light sources for overcoming the image breakup phenomena (col. 8 lines 54-58).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify a transfective display as Maeda et al. disclosed with (a) forming pixels with addressing means (TFT) for addressing each pixel and switching each pixel between different states resulting in different levels of transmission of light through the display for improving quality display (col. 8 lines 20-21); (b) the backlight comprising a plurality of sequentially flashing light sources for overcoming the image breakup phenomena as taught by Eichenlaub (col. 8 lines 54-58).

2. Claims 54 and 81-82 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maeda et al. (US6285422B1) and in view of Hasegawa et al. (US5654780) and Eichenlaub (US5428366A), and further in view of Handschy et al. (US5347378A).

Maeda et al. fail to disclose a transfective display, in which LC is formed a Pi cell.

Handschy et al. teach (col. 2 lines 51-58) a nematic liquid crystal "Pi-cell" has the ability to switch between colors with a voltage level at a significantly faster rate. The nematic liquid crystal inherently has substantially parallel surface director orientation.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify a transfective display as Maeda et al. disclosed with a nematic liquid crystal "Pi-cell" for switching between colors with a voltage level for providing frame-sequential color displays at fast rate (col. 2 lines 51-58).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571) 272-2296. The examiner can normally be reached on **MONDAY-THURSDAY:8:00AM-4:30PM**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (571) 272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
